7CCSMPRJ - Individual Project

Explainable Deep Learning for Portfolio Optimisation

Name: **Ingrid Pérez Aguilera**

Student Number: K24087939

Course: Computational Finance M.Sc.

Supervisor: Riaz Ahmad

Abstract

It is a précis of the report (normally in one page), which should include:

- A brief introduction to the project objectives
- A brief description of the main work of the project
- A brief description of the contributions, major findings, results achieved and principal conclusion of the project

Acknowledgements

It is a short paragraph to thank those whose have contributed to the project work.

0.1 Glossaries and Acronyms Sample use

The Latex typesetting markup language is specially suitable for documents that include mathematics.

Given a set of numbers, there are elementary methods to compute its Greatest Common Divisor, which is abbreviated GCD. This process is similar to that used for the Least Common Multiple (LCM) [1].
